Dear Allsafe Customer,

Are your food contact surfaces clean? Free from food debris? Can You Prove It? - Check out our new rapid swab product below. Our next Level 4 food safety course is w/c 29th September.

We are pleased to offer a new product to rapidly assess the level of contaminating food residues on food contact equipment and surfaces after cleaning has taken place. Based on an estimation of surface protein residue, the **Rapid Hygiene Testing Swab** gives an indication of hygiene levels with a colour change result.

With results available within 10 minutes, you can start work or re-clean equipment immediately.

The colour of the test reaction will indicate the level of protein residues on the surface.

By comparing the colour produced against the swab label an estimation of the surface cleanliness can be made.

- Green indicates a Pass result - Clean, No further action required
- Grey indicates a Caution result - Re-rinse
- Purple indicates a Fail result - Re-clean & Re-test.

Try this out now and take advantage of the reduced price for a limited period only and have the evidence to prove to your Environmental Health Practitioner or food safety auditor that your cleaning procedures work!

Click on **Rapid Hygiene Testing Swab** on the menu to order now.

.....

Level 4 (Advanced) Food Safety course - if you require training in the Level 4 Award in Managing Food Safety in Catering or Level 4 Award in Food Safety Management for Manufacturing click on **Level 4 (Advanced) Food Safety course** on the menu for full details of the course which starts w/c 29th September.

.....

Are YOU pleased with our products and services? Have they contributed to your training and food safety management programmes? Have they provided great value for money?

Then nominate Advanced Food Safety for the SOFHT Awards 2008. Click on the **SOFHT Awards** on the menu and nominate us for the **'Best Training Company'** or **'Best Trainer'** award categories.
